

The important factors for you are:

- That your system runs safely and without interruption.
- To be able to reduce down times.
- That your valves have a long service life.

You have already taken a step in the right direction by using LOHSE valves!

But for this quality product made in Germany, you also need to look for quality when it comes to repairs.

Repairs and factory overhauls for LOHSE valves

Examples of possible damage

Water hammer

Rotational wear

Trapped particles

Are you looking to have your valuable LOHSE slide valves repaired quickly and as cost-effectively as possible?

Then come to us and you will find yourself in exactly the right hands!

We offer:

- Repairs and overhauls using **genuine parts**
- **Manufacturer's technical expertise**

The benefits to you:

- Damage analysis and valve optimisation in close collaboration with our customers.
- Older slide valves are brought right up to date.
- Genuine parts are only available from us as the manufacturer.
- Your one-stop shop for valves, servicing and repairs.
- Functionality and **warranty as for a new valve.**
- Our qualified experts repair valves quickly and reliably.

Possible optimisation steps in response to wear caused by high rotation conditions

Wear of the slide plate

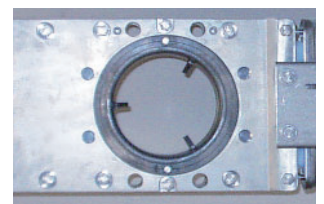

Wear minimised by ceramic panel

Wear of the flange ring

Wear minimised by conical ring with turbulence interrupter ribs

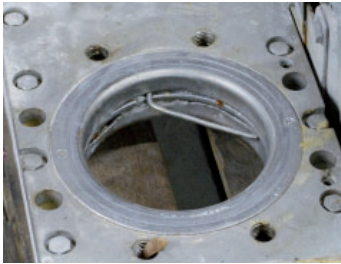

Workflow for a valve repair

Goods inwards check

- Goods inwards check
- Thorough cleaning and visual inspection
- Dismantling and damage report
- Estimate of costs

At this point, you will need to decide whether you want us to carry out the repair.

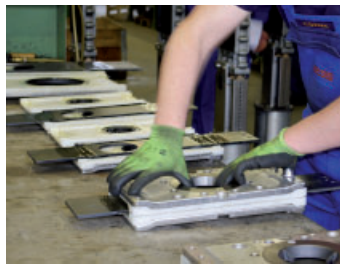

Visual inspection

- Confirmation of order after repair is approved
- Maintenance / repair / optimisation of the slide valve
All the seals and the slide parts will be replaced.
- Visual reconditioning
- Function and leak tests

We now provide exactly the same warranty for your repaired valves as for a new valve!

Dismantling and damage report

Repair

As-new, repaired valve
